

Course: AI and ML for Robotics

Lab Sheet 1: Getting Started with Robotics Environment

Objective:

To familiarize with notion of StateSpace ActionSpace ControlJoints in MUJOCO Engine..

Tools and Libraries Required:

Programming language: Python

Platform : Google Colab CPU

Simulation : mujoco

Practice Questions:

1. Explore Pybullet Engine and experiment using inbuilt bots like husky, kuka etc., visualize it in embedded code
 2. Display the state space, action space of the bots
 3. Identify the controllable components in the bots
 4. Compare the engine pybullet vs mujoco
-
